## COMPOST HERO BY WAKEFIELD BIOCHAR

*Nature's Power Through A Healthy Soil*

### ABOUT COMPOST HERO

Wakefield Compost HERO adds organic carbon and mycorrhizal fungi to your soil to increase water retention and nitrogen absorption. Through natural processes your soil will get more nitrogen and keep it in the soil through the additional microbes inoculated into the biochar. Wakefield HERO product reduces the potential of disease in the soil and creates an amazingly healthy living ecosystem in your soil that your plants need to thrive year after year.

### BENEFITS

- Nutrients are more available to your plantings
- Biochar will benefit your soil for 100's of years
- Superior water retention with biochar and premium compost
- Mycorrhizal Fungi stimulates microbial activity
- And, using a biochar blend sequesters carbon back into the soil instead of contributing to greenhouse gases

### APPLICATION INFORMATION

Compost HERO is a great, organic method of improving your lawn's health and strength through carbon sequestration and increased nitrogen-fixing through microbial activity. Top dress one cubic foot of HERO per 375 sq/ft of soil. Or, mix Compost HERO at a rate of one cubic foot per 32 sq/ft of soil down to 4" deep.

### CONTENTS

Compost HERO blended biochar mixes a microbe-rich compost with mycorrhizal fungi into 20% by volume of Premium BioChar for an optimal performance.

BIOCHAR - WOOD	Units
Total Carbon	85.7 % total mass
Total Ash	4.9 % total mass
pH	8.7 units
Nitrogen (N)	0.6 % wt.
Potassium (K)	0.1 % wt.
<b>USDA CERTIFIED BIOBASED PRODUCT</b>
